

Pollution

25

STOP USING SO MANY CARS and keep it clean.
USE TRAINS and buses to keep it green.
STOP using fuel because its very mean
TRY to keep cities clean, very clean.

SAVE WATER and the oceans from destruction
Turn off the taps to make water reduction
Humans are like hungry vultures
Eating away at everything and destroying cultures.

Trees are the source of life, so stop cutting them down
Turn off the taps when they are not needed.
this Environmental warning should be heeded.
STOP wasting paper, dont put it in the bin
Send it off to recycling and make it thin.

By Saving water and using less
You are saving ENERGY too
So next time you use water
Think carefully about what you do.

So to stop pollution that's so true
we must clean up our act both me and you.

Pollution, Pollution must have a solution
