

Revolution Recipe

Recover any wastage

Remember to separate it

React to those who abuse mother earth

Refuse the products that harm every living being

Redo it all over again

AND.....

Relive the beauty in nature

Rediscover the clean air

Regrow the forests that have been lost

Return to the natural world

Retell the story of how we became waste free

By Pratibha Savani

In Perfect Unity

Hundreds of them gravitate towards that special flavour

Only the best nectar will do when transporting it back to the hive

Neatly packed in hexagons as they empty their little stomachs

Effortlessly their instinctive activities make our lands richer with life

Yet we do not recognise their impact...

Cleverly as they buzz, they sprinkle that pollen magic around

Our gardens and forests attract diverse wildlife and plants, sustaining our food chain

Making our ecosystem thrive in a cycle of an abundance playground

Bees work their lives making what we need, where would we be without this
important breed?
